Link AFAS Foleta

Smart software link for educational institutions

The end of the school year is always a stressful period. Changes in employment and contracts, the formation planning and the correct implementation of all changes before 1 August. In short: an annual peak for the HR administration of your educational institution. Choose Salure's smart software link between AFAS and Foleta.

Salure has developed a link between AFAS and Foleta. This link ensures a clear display of data from both software packages. With just a few clicks, you have a clear dashboard where you can quickly retrieve all relevant changes and other information. Moreover, Salure's software automatically recognises critical points or marks errors, which is highly convenient for your HR staff.

Foleta
Foleta offers smart software that ensures that the budget of your educational institution can be used optimally. An important advantage of Foleta is that all data is stored online, making it easy to access and transfer to a colleague.

Complete insight
You can search tens of thousands of data lines with the push of a button. All contract data from AFAS and Foleta can be added to a dashboard, which can always be viewed with up-to-date data. Foleta and Profit complement each other perfectly. This eliminates the need to manually copy data between the two systems. This reduces susceptibility to errors and improves efficiency in the HR administration of your educational institution.

"The best of two software packages in one link."

"Want to benefit from this smart link too? Then opt for Salure."

Does the smart link between Foleta and AFAS sound good to you? Would you like to know more about the possibilities of implementing this solution at your educational institution? Salure is happy to provide you with information that is fully tailored to your organisation. Please contact Jaco van Hengel.
