

Salure services

Progressing smarter together

Payroll administration is changing rapidly. From paper to PC. From offline to online. From administrator to consultant. Salure follows developments closely and supports you with a complete service package.

Salure's expertise lies at the intersection of payroll administration, innovative ICT solutions and effective advice. The motto 'Progressing smarter together' is in our experts' DNA. Salure is the ideal partner for outsourcing payroll administration, consultancy and smart software solutions in the field of payroll.

Salure is your versatile expert in:

- **Payroll administration**
Control, support or complete input and handling of your (international) payroll administration;
- **Functional management**
Rely on Salure's functional management to set up and manage your systems;
- **Conversion and design**
Clear insight into opportunities to optimise your business operations intelligently;
- **Business intelligence**
Smart dashboards give you insight into your current data with one click.

Versatile in payroll administration

Every client has specific questions and needs. What exactly do you need? Complete outsourcing of your payroll administration, where Salure takes care of the entire payroll process, or just continuity assurance? Do you want to progress smarter together with Salure? Our enthusiastic team of experts is at your service.

That's why outsourcing to Salure is smart:

- **Ideal combination**
Experience the ideal combination of knowledge, experience and smart software;
- **Continuity assurance**
You'll never depend on one person again;
- **Always accessible**
The client team is always available for questions.

"We work smart and sensibly."

Expert advice

AFAS holds no secrets for Salure's experts. They are at your service with enlightening advice. Do you need an optimisation of your AFAS package, or a switch from another system to AFAS? Salure's experts guide your employees through the process, so that they can get the most out of AFAS. The end result: an equipped software package, ready for the future.

Functional management

In addition to advice, you can also come to us for functional management. Salure offers both on-site and remote support. Our experts represent the right mix between solid craftsmanship and the courage to innovate.

Are the processes in your organisation still efficient and effective? Or is there room for improvement? Have your organisation assessed by Salure's business consultants. They are Lean Six Sigma Black Belt certified and provide an analysis and optimisation plan based on the conversations conducted.

Efficiency in HR

A strong HR department forms a solid foundation for your personnel administration. Would you like Salure to (temporarily) take over your HR administration? Not a problem. Salure supports your HR department with smart dashboards. Your HR department and management will gain insight into KPIs, absenteeism, wage costs and contracts.

Efficiency in HR can also be achieved by allowing employees to do more themselves. To this end, Salure offers the convenient HR Self Service, where employees can enter changes themselves in a portal using a PC or smartphone.

Get more insight into your data

From a plethora of information to enlightening insight. For many HR departments, this is a big step. Various systems and networks often store a wide range of data about employees. Combining this loose data into a valuable whole takes a lot of non-billable hours, effort and manpower. Can't see the forest for the data? Salure offers smart software and business intelligence solutions for more insight and convenience.

With Salure's software solutions, you can:

- **Combine data**
Create useful links between different systems for insight;
- **Create smart dashboards**
Gain insight into data with Business intelligence dashboards from SalureConnect;
- **Be fully compliant**
Find and schedule replacements with the Replacement Tool.

Smart links

Have your systems work together optimally via smart links. These links make it possible to have data flow between different systems. Do you enter all data via one system but need to retype it into another system? Not anymore. Salure links the systems to SalureConnect. SalureConnect then ensures that the correct fields are filled in the other system.

" We work with the client to find the best solution."

Data-driven decision making with SalureConnect

SalureConnect collects data from all kinds of systems. Through this data, it is possible to create clear dashboards. This gives you more insight into company data. This ensures 'data-driven decision making'; you make decisions based on actual figures instead of going by feeling.

"Salure optimises your HR administration with smart workflows"

International

SalureConnect is a system that also ensures that international organisations gain more insight into their data. The information from local payroll partners is linked to a central system. Therefore, thanks to a link with the ECB, the data can be read universally. This is useful, for example, when comparing operating results of business units in multiple countries, with different currencies.

Better insight without disrupting business processes

Thanks to SalureConnect, there are no changes in the daily business operations for the local payroll partner, but the head office still benefits from better insight into the various branches.

Do you want to use smart software for your organisation? Salure is happy to help!

Want to outsource payroll administration or get more insight into your data?

Are you looking for an expert advisor? Salure is the ideal partner in the field of payroll administration, advice and business intelligence. Please contact Paul van Hengel.
